WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/JP2004/016792

	_	В	ox N	o. I Basis of the opinion			
	1.	With regard to the language , this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.					
		☐ This opinion has been established on the basis of a translation from the original language into the foll language which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).					
	2.	W ne	With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:				
		a. type of material:					
				a sequence listing			
				table(s) related to the sequence listing			
45		b. format of material:					
				in written format			
				in computer readable form			
		c. time of filing/furnishing:					
				contained in the international application as filed.			
				filed together with the international application in computer readable form.			
				furnished subsequently to this Authority for the purposes of search.			
A	3.		cor	addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto is been filed or furnished, the required statements that the information in the subsequent or additional propriets is identical to that in the application as filed or does not go beyond the application as filed, as

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/JP2004/016792

_	Во	x No. II	Priority		:				
1.		☑ The following document has not been furnished:							
		□ copy of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(a)).							
		translation of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(b)).							
		Consequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on the assumption that the relevant date is the claimed priority date.							
2.	This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43 <i>bis</i> .1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.								
3.	It has not been possible to consider the validity of the priority claim because a copy of the priority document was not available to the ISA at the time that the search was conducted (Rule 17.1). This opinion has nevertheless been established on the assumption that the relevant date is the claimed priority date.

Re Item V

纖

1. Reference is made to the following document:

D1: PATENT ABSTRACTS OF JAPAN vol. 1998, no. 02, 30 January 1998 (1998-01-30) -& JP 09 260650 A (FUJI ELECTRIC CO LTD), 3 October 1997 (1997-10-03)

- 2. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1-4 and 7 is not new in the sense of Article 33(2) PCT.
- 2.1 The document D1 discloses (the references in parentheses applying to this document, in particular figures 2 and 4): a top region (24) of the second conductivity type, a deep region of the second conductivity type, an intermediate region (23) of a first conductivity type for isolating the top region and the deep region, a trench gate (27,47) facing a portion of the intermediate region via an insulating layer (26), wherein the portion facing the trench gate isolates the top region and the deep region, and wherein the trench gate extends along a longitudinal direction and width of the trench gate varies along the longitudinal direction (see D1, figure 4)

 The subject matter of dependant claims 2-4 and 7 is also disclosed in D1 (see D1, figure 4). Hence the subject matter of claims 1-4 and 7 is not new (Article 33(2) PCT).
- 3. Dependent claims 5 and 6 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect or inventive step (Art. 33(3) PCT), as the skilled person would obviously, without exercising any inventive activity, choose the width of semiconductor layer to get it depleted when a known voltage is applied, and the skilled person would obviously and without exercising any inventive activity use the trench gate of the MOSFET known from D1 in an IGBT.

Hence the subject-matter of claims 5 and 6 lacks an inventive step (Art 33(3) PCT).
